PATTERN INFORMATION

The Copper Crest sweater is worked from the top down in a rib stitch pattern. Raglan increases shape the yoke and define the front, back and sleeves. The body is worked straight in the same stitch pattern, allowing the length to be adjusted if needed.

The sleeves are long and deeply tapered, worked in rounds from the armhole to the cuff. There is no separate hem, cuff or neckline. The entire sweater is worked in one continuous rib structure, creating a fitted and minimal finish suitable for layering under jackets or blazers.
